

## Headlok®

Introducing Headlok®, a new range of security head screws from Buildex®, Australia's leading manufacturer and supplier of self-drilling screws and fasteners.

Headlok® Security Head Screws are designed for securely fastening both metal roofing and cladding profiles, on buildings where the prevention of unauthorized entry and safeguarding of property is of paramount importance. This includes warehouses and shopping centres, government and defence installations, correctional and storage facilities, community centres and water treatment facilities.

Headlok® Security Head Screws are tamper-proof because they feature a totally unique head design. They can only be installed or subsequently undone by using the Buildex® Security Head Socket. To maintain complete security, distribution of the socket is extremely limited with end-users placed on a registration database to ensure traceability of socket location.
